DSM to build new factory for waterborne emulsion resins (NeoCryl) in Waalwijk, the Netherlands

Royal DSM N.V. has decided to build a new factory for waterborne emulsion resins. This new plant will produce waterborne emulsions to be marketed by DSM NeoResins⁺. Production will come on stream at the end of 2008. The total investment costs amount to EUR 30 million.

The new factory will be built at the existing DSM NeoResins⁺ production site in Waalwijk, the Netherlands, which is mainly used for the production of specialty products such as acrylic emulsions, acrylic beads and urethane resins.

DSM NeoResins⁺ is a leading global player in the waterborne emulsions market, focusing on high-performance products. In this product group DSM expects 7% growth worldwide for its waterborne emulsions in the coming years. The products are sold in the company's key coating segments for joinery, decorative and industrial wood applications and for the graphic arts industry. Further and stronger growth is expected in the light of the new upcoming VOC regulations. DSM's waterborne emulsions comply with all upcoming regulations and offer a good alternative to less environmentally friendly solvent-based resins while keeping high performance and durability standards.

"This expansion fits in perfectly with DSM's strategy Vision 2010 – Building on Strengths and will make DSM NeoResins⁺ fit for growth and for producing new innovative and sustainable products. With this investment we are underpinning our strong commitment to the coatings and graphic arts market and are expressing our confidence in the success of our innovation pipeline," commented Nico Gerardu, member of DSM's Managing Board and responsible for the Performance Materials cluster.

About DSM NeoResins⁺

DSM NeoResins⁺ is the number one leading, global supplier of innovative specialty resins, focused on fulfilling the needs of the coatings and graphic arts industries. DSM NeoResins⁺ has 1,200 employees and seven manufacturing sites: in Frankfort and Wilmington (US), Shunde (China), Hoek van Holland and Waalwijk (the Netherlands), Meppen (Germany) and Parets (Spain). Being focused on customer needs it has five Application and Research & Technology Centers: in Wilmington (US), Shanghai and Shunde (China), Parets (Spain), Waalwijk and Zwolle (the Netherlands). All of these centers are supported by three Customer Service Centers: in Wilmington (US), Shunde (China) and Waalwijk (the Netherlands).
